

# DAVID KIRAGU

ICT Profesional | Cybersecurity Enthusiast | DevOps Aspirant

## About Me

ICT Professional with a strong background in management, customer support, cybersecurity, system administration, and Python programming. I am a Certified Cyber Associate, Cyber Analyst, and Information Manager with hands-on experience in Linux environments, troubleshooting, threat analysis, incident response, and secure infrastructure design. I have a strong interest in implementing DevOps practices to automate workflows and optimize systems. Well-versed in system architecture, cybersecurity fundamentals, cloud technologies, and infrastructure optimization, I am passionate about continuous learning and innovation in secure software development and automation.
