PROFILE

A diligent developer with few years of hands-on expertise garnered through building web applications solo leveraging JavaScript, React, Node.js, PostgreSQL and modern software principles encompassing designing systems focused on security, performance and scalability. I live for the thrill of solving multifaceted problems through clean modular code backed by accountability for delivering polished apps enabled by my visualization analytical and collaboration skills – be it working solo or using GitHub in teams. I am eager to join driven teams where I can continue honing my real-world development skills spanning cloud platforms, REST APIs or UI/UX to craft innovations that positively impact lives.

Please feel free to check live project samples I have built over the years showcasing hands-on expertise via https://github.com/Gymnott1.
